Our Policy

SureLeaf Systems, as management system consultants, auditors and trainers, are committed to delivering exceptional services to our clients, exceeding their expectations whenever possible.

We will strive to continually improve our systems, our performance and our range of services by innovating, encouraging creativity and exploring new ideas, new approaches and new technology. We identify risks and opportunities, preventing negative impacts and acting on opportunities when we can.

We are committed to minimising our impacts on the environment and risks to our people, by carrying out our work in a sustainable, safe, healthy, efficient, ethical and professional manner that complies with all relevant legal and other requirements.

We will implement and maintain systems aligned with International Standards to facilitate and deliver on these commitments. We will ensure that everyone who works with or for us engages with our values and agrees with our commitments.

October 2018

Shane Curran, SureLeaf Systems
